"CONCRETE & CONSTRUCTIONAL ENGINEERING"

VOL. XLVIII *FORTY-EIGHTH YEAR OF PUBLICATION* 1953

CONCRETE PUBLICATIONS, LTD., 14 DARTMOUTH STREET, LONDON, S.W.1

INDEX

PAGE

Accelerator and cyclotron building 397
Acid resisting concrete 254
Aggregates, Gap-graded, by J. D. O'Keeffe 173
„ Standard for slag 152
Airport, Proposed terminal building at Renfrew .. 144
Analysis, The "traverse" method of stress, by Ralph W. Stewart 205
Arch of 900 ft. span, Proposed 363
„ supported by columns fixed at their bases, Analysis of a parabolic, by V. A. Morgan 269, 391
Arches continuing over three spans and supported on two intermediate columns, by V. A. Morgan .. 105

AUTHORS:

Baker, Professor A. L. L., on The ultimate strength of prestressed beams, 142; on A graphical method of designing cylindrical shells 303
Bar, J., on A method of designing slabs 355
Bennett, E. W., M.Sc., on the Calculation of deflections and bending moments at the supports of prestressed beams 343
Chronowicz, Albin, on Continuous beams on wide supports 131
Cooper, N. E., on The relative economy of framed structures and structures with load bearing walls 257
Dews, N. A., on Prestressed precast concrete footbridges 165
Gallia, Andrew, on Design of cantilever slab bridges with stiffened kerbs 315
Gartner, R., D.Sc., on Design of indeterminate structures by the "plastic" method .. 3, 85
Hammond, Rolt, on Foundation for a large hammer 145
Holdaway, Albert E., B.Sc., Ph.D., on Influence lines for prismatic continuous beams 229
Lee, Donovan H., B.Sc., on The ultimate strength of prestressed beams 143
Magnel, Professor G., on The ultimate strength of prestressed beams 73, 143
Morgan, V. A., M.Eng., on Analysis of arches continuing over three spans and supported on two intermediate columns, 105; on Analysis of a parabolic arch supported by columns fixed at their bases 269, 391
O'Keeffe, J. D., B.E., on Gap-graded aggregates .. 173
Reynolds, C. E., B.Sc., on Loads on groups of free-standing piles 373
Samuely, Felix J., B.Sc., on The application of reinforced concrete to school buildings, with particular reference to precast and prestressed concrete 289, 327
Stewart, Ralph W., on The "traverse" method of stress analysis 205
Zboinski, T. K., on Design of reinforced concrete slabs in liquid-containing structures 13

Bamboo and wire-mesh reinforcement, Gunite on .. 189
Beam floor, A composite tee- 193
„ roof, A long-span hollow- 212
Beams for mine shafts, Precast concrete 224
„ Influence lines for prismatic continuous, by Albert E. Holdaway 229
„ on wide supports, Continuous, by Albin Chronowicz 131
Blocks and slabs, Walls of 192
Bolts in concrete, Fixing 284

BOOK REVIEWS:

Approximations Following from the Maximum Condition Applied in Theories of Plasticity and Earth Pressure, by H. Craemer 262
Architects' Detail Sheets 191
Architecture Préfabriquée, by P. Abraham .. 99
Bandesanstalt für Strassenbau Wissenschaftliche Berichte. Heft 1. Betongefuge und Rissebildung in Betonfahrbahndecken, by Rudolf Dittrich .. 204
Beton-Kalendar 99, 354
Building Construction and Drawing, by George A. and A. M. Mitchell 354
Calculation, Design and Testing of Reinforced Concrete, by K. L. Rao 390
Concrete Mix Design. A Practical Method for the Production of Quality Concrete from Available Materials, by L. Boyd Mercer 302
Die Bodenphysikalischen Groudlagen-Stutzmauern. Handbuch für Stahlbetonbau, by Otto Mund .. 390

BOOK REVIEWS *(contd.)*: PAGE

Dimensionnement Experimental des Constructions, by Manuel Rocha 191
Durchlaufträger, by Adolf Kleinlogel and Arthur Haselbach 100
Erlauterungen zu den Stahlbetonbestimmungen mit Beispielen, by W. Gehler in collaboration with Christian Palen 204
Fahrbahnplatten von Strassenbrücken Berechnungstafeln, by Hubert Rüsch 262
Funções Ortogonais na Resolução de Problemas da Teoria da Elasticidade, by T. van Langendonc .. 191
Lighting in Industry 262
The Marseilles Block, by Le Corbusier 287
Pile Foundations, by R. D. Chellis 99
Prestressed Concrete, by Kurt Billig 191
Prestressed Concrete, by Y. Guyon 302
Proceedings of the International Congress of Prestressed Concrete, Ghent, 1951 204
Publications of the International Association for Bridge and Structural Engineering 116
Quality Concrete 191
Reactions between Aggregates and Cement 116, 302
Rigid Frame Formulas, by A. Kleinlogel 204
Simple Examples of Reinforced Concrete Design, by Oscar Faber, C.B.E. 100
Soil Mechanics, Foundations, and Earth Structures, by Gregory P. Tschebotarsoff 99
Specifications for the Construction of Housing Estate Roads using Soil-Cement 262
Strength, Safety, and Economical Dimensions of Structures, by A. I. Johnson 354
Studies in Elastic Structures, by A. J. S. Pippard .. 100
Symposium on Prestressed Concrete Statically Indeterminate Structures 262
Theory and Practice of Reinforced Concrete, by C. V. Dunham 390
Theory and Practice of Structural Design applied to Reinforced Concrete, by B. Eriksen 354

Boring through reinforced concrete, Thermic .. 128
Bottling store at Bishop's Stortford 42
Bridges, Cantilevered shuttering for 306
„ Design of rigid frame 128
„ with stiffened kerbs, Design of cantilevered slab, by Andrew Gallia 315
Broader minds 371

Caisson, Concrete ship used as 380
Cement, Hydrophobic 255
„ Timber silos for 218
Coal preparation plant at Maltby 22
College at Wrexham, Technical 241
Columns encased in concrete, Fire resistance of steel .. 218
Concrete-and-glass panels, Tests of 387
Concrete at the time of loading, The strength of 1, 12, 79, 115
„ mixtures, Stable 161
of uniform strength 313
„ pumped to a height of 176 ft. 387
Corbusier, A book by M. Le 287
Cyclotron building, Accelerator and 397

Dam at Bort-les-Orgues, Auvergne, France 278
Degrees 71
Denmark, Precast construction in 381
Docks and quay at Sunderland 35
Dorchester Hotel, London, Extension of 169
Drawing-office practice 311

Economy of framed structures and structures with load-bearing walls, by N. E. Cooper 257
Education of technologists 195

Facing slabs, Precast 247
Factory at Harwich, A reinforced concrete 39
Filtration plant at Croydon, Water 43
Fire grading of buildings 141
„ resistance of concrete slabs 203
„ „ of steel columns encased in concrete .. 218
„ „ tests of building materials 360
Flats in South London, Reinforced concrete 307
Flood protection works at Gainsborough 54
Floor, A composite tee beam 193

(continued overleaf)

PAGE

Floor slabs, Lifting complete 222
Footings, Bearing capacities of 403
Foundation for a large hammer, by Rolt Hammond .. 145
Foundations, Flexible joints in 244
Framed structures and structures with load-bearing walls, Relative economy of, by N. E. Cooper .. 257

Gasholder tank, Large 33, 179
Gas-washing plant at Bristol 49
Grandstand in South Africa 349
Grouted concrete, Strength of 239
Gunite on bamboo and wire-mesh reinforcement .. 189

Hammer, Foundation for a large, by Rolt Hammond 145
Hangars, Circular 124
Humidity, Measurement of 306

Impact, Resistance of concrete to 340
Indeterminate structures by the "plastic" method, Design of, by R. Gartner 3, 85

Joints in foundations, Flexible 244

Laboratory for nuclear research 364
Liquid-containing structures, Design of reinforced concrete slabs in, by T. K. Zbonski 13
Load-bearing walls, Relative economy of framed structures and structures with, by N. E. Cooper .. 257
Loading, Strength of concrete at the time of 1, 12, 79, 115
London County Council Regulations 79

Moving form construction, Unusual 21
Multiple-story dwellings at Mitcham 121

Nuclear research, Laboratory for 364

PATENTS:
Porous concrete 280
Shutters for beams and slabs 221
„ „ walls 280

Piles, Casting 358
„ Loads on groups of free-standing, by C. E. Reynolds 373
Pipes, Corrosion of steel in 152
"Plastic" method, Design of indeterminate structures by the, by R. Gartner 3, 85
Power station at Plymouth 44
Precast and in situ construction, Combined 249
„ „ prestressed concrete, The application of reinforced concrete to school buildings with particular reference to, by Felix J. Samuely 289, 327
„ buildings in Eire 187
„ construction in Denmark 351

PRESTRESSED CONCRETE: (see separate list below).
Probabilities and possibilities 103

Quay at Sunderland 35

Railway station at Sheffield, Reconstruction of .. 172
Regulations for reinforced concrete, L.C.C. 79
Reinforcement, Prefabricated 158
Reinforcing concrete, Prestressed bars for 333
Research on concrete 126, 163
Reservoir at Stafford 18
Roads, lean concrete compacted by roller in 339
„ Research on 367

PAGE

Roadways at sugar refineries, elevated 23
Roof at Edinburgh, A shell 323
„ Long-span hollow-beam 212
„ North-light shell 361
Roofs, in "shell" construction, Domed 64
„ Thin concrete walls and 189

School, Aberdeen, Cummings Park 249
„ at Southampton 51
„ buildings, The application of reinforced concrete to, by Felix J. Samuely .. 289, 327
„ for girls, East Ham, London 233
„ in a mining district 240
„ Ipswich, Castle Hill 247
„ London, Cardinal Griffin 245
Schools in Yorkshire 236
Sewage, Deterioration of concrete by 232
„ disposal works at Willington 68
Shearing stresses 129
Shed at Bury St. Edmunds, Goods 42
Shell construction, Domed roofs in 64
„ roof, A north-light 361
„ „ at Edinburgh 323
Shells, A graphical method of designing cylindrical, by A. L. L. Baker 303
Shuttering for bridges, Cantilevered 306
Slabs, A method of designing, by J. Bar 355
„ Lifting complete floor 222
„ Precast facing 247
„ Walls of blocks and 192
Slag aggregates, Standard for 152
Soil-boring machine, New 123
Soils, Testing stabilized 311
Steel frame structure, Concreting a 38
„ works, Reinforced concrete at a 57
Steelwork, Concrete-encased 127
Stress analysis, The "traverse" method of, by Ralph W. Stewart 205
Sulphate attack on an underground culvert 285
Surfaces, Roughening 226

Tank, A 500,000 gallons elevated 47
„ Large gasholder 33, 179
Test-house and exhaust tunnels, Jet engine 80
Testing, Non-destructive 404
Theory and the engineer 227
Tower with arched walls, Water 268
Towers for drying fire hoses 152
"Traverse" method of stress analysis, by Ralph W. Stewart 205
Tunnel constructed in sand 252
„ for Gloucester main drainage 59
„ Unusual method of constructing a 366
Tunnels, Jet engine test-house and exhaust 80

"Vacuum concrete" processes 213
Vibration of concrete mixtures 98
Vibrations in structures 127

Wall, A wind-shield 352
Walls, Relative economy of framed structures and structures with load-bearing, by N. E. Cooper 257
„ and roofs, Thin concrete 189
„ Reinforced concrete 126
„ Water tower with arched 268
Warehouse, A blending and bottling 359
„ at Liverpool 53
Water purification works near Lichfield 66
„ tower of 1900 tons, Moving a 9
Wharf and jetty at Cowes 16

PRESTRESSED CONCRETE

PAGE

Beams of steel and concrete 402
„ Calculation of deflections and bending moments at the supports of prestressed, by E. W. Bennett 343
„ Ultimate strength of, 142; by Professor G. Magnel, 73, 143; by Donovan H. Lee .. 143
„ and slabs 334
„ in school buildings, by Felix J. Samuely 289, 327
Bridge across the Rhine 263
„ at Rotherham 19
„ in Holland 283
„ three miles long in the U.S.A. 81
„ with a continuous girder 281
Cables, Grouting 98
„ Stranded-wire 84
Congress in London 348
Dam, Strengthening a 333
Deflections and bending moments at the supports of prestressed beams, by E. W. Bennett 343
Developments in prestressed concrete 341

PAGE

Factory for products 197
„ in Argentina 153
Footbridge at Edinburgh 95
Frame, Heavy building 219
„ for elevated tanks, Precast 156
Gas holder tank 398
Grouted concrete, by Rolt Hammond 145
Hangars at London Airport 29
Jack for tensioning single wires 369
"Leoba" method 266
Measurement, Standard method of 125
Precast footbridges, by N. A. Dews 165
Preflex beams 402
Reinforcement bars 333
Research 126
Roads, Research on 399
Staircase, Precast helicoidal 388
Stairs, Test of 117
Tank, Cylindrical 310
Tower frames, Precast 61
